

## Case study #1

### **LaserCEM® contract:**

AP2E distributor in Oceania, [AquaGas Pty Ltd](#), based in Brisbane (Australia) has been awarded a major contract for the supply, integration, installation and commissioning of two complete CEMs used for compliance stack emissions monitoring of Prony Power Station located at one of the largest mining facilities

The **LaserCEM®** was selected as the most suited technology with regards to the application requirements and harsh monitoring conditions, providing the plant operator ENERCAL with the last generation of CEMs multigas analyser for online analysis of HCl, SO<sub>2</sub>, NO, NO<sub>2</sub>, CO, CO<sub>2</sub> and O<sub>2</sub> at their two coal fired boiler facilities.

The strong partnership between AP2E and AquaGas has led to this first shared success, the acquisition of a capital reference for the **LaserCEM®** in the field of power generation while enforcing AP2E position in Oceania.

## Case study #2

### **H<sub>2</sub> in chlorine contract:**

AP2E distributor in Taiwan, [Kinetics Technology Corporation](#), has been awarded 2 major contracts for the engineering, supply, integration, installation and commissioning of two **ProCeas®** hydrogen gas analysers used for safety monitoring and process control in some chlorine alkali plants in Taiwan.

Direct and accurate measurement, fast response time, low maintenance were the key points for selecting the **ProCeas®** as the most suited technology (Low Pressure Resonant Cavity Spectroscopy) for online analysis of H<sub>2</sub>, CO<sub>2</sub> and O<sub>2</sub>.

This reference strengthens the position of AP2E in the measurement of hydrogen in the field of chlorine alkali plants and paves the way of our presence in Taiwan.

## In the air

### **ISO 9001v2015 :**

AP2E obtained in September 2016 the Quality Management System certification, ISO9001v2015, granted by the "Laboratoire National d'Essais" (the French National Testing Laboratory), one of the leading laboratories in the field of measurement in Europe. This certification covers the design, manufacturing, sales, and distribution of gas analyzers. This certification demonstrates AP2E's commitment to provide with products that meet customers / regulations requirements.

## AP2Events

### **Atmos'Fair**

AP2E will hold a conference on "ProCeas® technology - Monitoring of formaldehyde in ambient air" next October 11th at 16:40 on [Atmos'Fair](#) exhibition in Paris.

### **Euronaval**

AP2E will attend [EURONAVAL 2016](#) next October 19th in Paris Le Bourget to present LIP 3+ AP2E new innovative project : the compact multi-gas analyzer with revolutionary measurement performances in partnership with [DGA-Rapid](#) innovation program.
